

*B1/C1*  
*embodiment applies appropriately. The same members as in Fig. 2 are given*  
*the same numerals as used in Fig. 1.--*

**Page 12**

**Replace the paragraph beginning at line 8, with the following new paragraph:**

--The thick thermoplastic fiber 2 content in the air-laid nonwoven fabric 5 preferably ranges 30 to 100% by weight, particularly 50 to 100% by weight, to ensure capability of removing caked-on soils, such as denatured oil, baked substances and scale in a kitchen, and sebum, scale, soap scum, dust in a bathroom. Other fibers which constitute the air-laid nonwoven fabric 5 in addition to the thick thermoplastic fiber 2 include thermoplastic fibers having a fineness of 0.5 to 5 dtex, particularly 1 to 3 dtex, and a fiber length of 2 to 15 mm, particularly 3 to 8 mm (hereinafter referred to as thin thermoplastic fibers). The content of the thin thermoplastic fibers in the air-laid nonwoven fabric 5 is preferably 1 to 50% by weight, particularly 5 to 30% by weight. The combined use of such thin thermoplastic fibers with the thick thermoplastic fibers 2 is preferred for decreasing the basis weight of the cleaning sheet 1 while retaining the scouring or scraping properties.--
